

Asset Tracking & Management Systems

Wireless Data Management Systems for Mobile Platforms

The Lasso AnyData

- GPS and Assisted GPS (AGPS)
- CDMA2000 – gpsOne support
- iPursuit Web Application Internet interface
- 1220 mAh battery
- Battery life 15 days @ 1 fix per 15 min
- Light weight 75g (2.5 oz)
- Rugged
- 12V vehicle adapter
- 120 v charger
- Dimensions: 81 X 27 X20.5 mm

- GPS Satellite Location
- Assisted GPS Cell Tower Location
- Web activated location request
- Integrated antennas
- Panic Button or Geo-Fence Button
- LED indicators
- More water resistant and dust proof than cell phone
- Package tracking
- Personal tracking
- Pet tracking
- Locate and real time track from iPursuit web application
- SMS alerts to cell phone
- Geo-Fence ability
- Belt Clip
- Magnet Mount
- Screw mount

GPS*Pursuit* have joined with **AnyData and Bell Mobility** to offer this small tracking device integrated into our *iPursuit* web application. Light Weight unit is ideal for personal protection, pets, mobile asset tracking and surveillance

The Lasso AL has been designed based on requirements for a compact GPS device which can be used for security and surveillance purposes. It has been specifically designed to be portable and rugged allowing it to be used in a variety of ways including surveillance, personal protection, and asset protection such as the tracking of packages, vehicles and boats. In assisted GPS mode the unit can be located using the cell tower telemetry technology provided by our connection to Bell Mobility's LBS and PDE servers. Approximate locations can be achieved inside buildings or containers when no satellites are visible.

Geofence alarms can be sent by SMS or Email to first responders and 24/7 monitoring is available with our partners G4S.

*Call center provided under separate contract.
